The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status

#### **DETAILED ACTION**

#### Election/Restrictions

Applicant's election without traverse of the invention of group I, claims 16-21, in the reply filed on December 6, 2004, is acknowledged.

### **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## **Drawings**

The Examiner approves the drawings filed on July 8, 2003.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16, 17, 19, 20, and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dhong et al., U.S. Patent 4,954,854.

Dhong et al. disclose a vertical transistor which comprises at least one trench wall, see trench 20 in Fig. 5; a plurality of source and drain regions, reference numerals

Application/Control Number: 10/615,567

Art Unit: 2822

Figs. 14 and 15.

18, 24, and 26 in Figs. 1 and 10; a channel region running essentially vertically on the trench wall between the source and drain regions; a gate electrode 32 shown in Fig. 12, a gate oxide 30 insulating the gate electrode 32 from the channel region, as shown in Fig. 12; and at least one insulating structure 16A for insulating between different vertical transistors, se Figs. 1 and 12 and column 5, lines 28-29. Note in Figs. 1 and 12 that insulation structure 16,16A bounds gate electrode 32 at the uppermost potion of the trench. Since the gate electrode 32 is formed flush against insulation structure 16, 16A at the uppermost portion of the trench, as shown in Fig. 1, the gate electrode would have an internal angle  $\alpha$  of 0° with insulation structure 16, 16A. Also note that Dhong et al. teaches that the vertical transistor can be used in a DRAM cell, wherein the DRAM

## Allowable Subject Matter

cell includes a capacitor and the vertical transistor formed above the capacitor, see

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additionally cited prior art discloses vertical transistors and/or transistors in which the gate electrode is bounded by an isolation structure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Wilczewski whose telephone number is (571) 272-1849. The examiner can normally be reached on Monday and Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
